

Food, Fab & Fun!

Our Story

FabCafe is a place where people can have fun, tasty and creative experiences. Founded in Tokyo, FabCafe was the first place in the world to put new devices like a laser cutter and a 3D printer into a cafe and make FAB experiences easily accessible to the public. Under the umbrella of FabLab, FabCafe shares the vision of FabLab, “enabling invention by providing access to tools for digital fabrication,” and especially focuses on creative exploration.

Here in Singapore, we’re partnering with the ArtScience Museum to bring the best of the FAB movement from around the world with the aim to educate and inspire our customers. We host evening meetups bringing together designers, technologists, scientists and entrepreneurs. We also run daytime workshops for adults and kids of all ages who want to learn about digital fabrication and making.

fab

1. *adjective*
fabulous. wonderful, extraordinary!

2. *noun*
fabrication. the action or process of manufacturing or inventing something.
